Seventy-third session
Second Committee
Agenda item 20 (c)
Sustainable development: disaster risk reduction

Egypt:* revised draft resolution

Effective global response to address the impacts of the El Niño phenomenon

The General Assembly,

Recalling its resolutions 69/218 of 19 December 2014, 70/110 of 23 December 2015 and 71/227 of 21 December 2016 and Economic and Social Council resolutions 1999/46 of 28 July 1999, 1999/63 of 30 July 1999 and 2000/33 of 28 July 2000, and taking into consideration all other relevant resolutions,

Noting that the El Niño phenomenon has a recurring character and can lead to extensive natural hazards with the potential to seriously affect humankind,

Noting also that technological developments and international cooperation have enhanced the capabilities for the prediction of the El Niño phenomenon and thereby the potential for the preventive actions that may be taken to reduce its negative impacts,

Reaffirming the Sendai Declaration[1] and the Sendai Framework for Disaster Risk Reduction 2015–2030,[2] adopted at the Third United Nations World Conference on Disaster Risk Reduction,

Reaffirming its resolution 70/1 of 25 September 2015, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner, and to

* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

[1] Resolution 69/283, annex I.

[2] Ibid., annex II.

Please recycle

building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Welcoming the Paris Agreement [3] and encouraging all its parties to fully implement the Agreement, and parties to the United Nations Framework Convention on Climate Change [4] that have not yet done so to deposit their instruments of ratification, acceptance, approval or accession, where appropriate, as soon as possible,

Noting that further research on the impacts of climate change, including the effects of arctic changes on the El Niño phenomenon, can support more effective planning for resilience and recovery,

Noting also with concern the scientific findings contained in the special report entitled *Global Warming of 1.5°C* of the Intergovernmental Panel on Climate Change,

Reaffirming its resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

Reaffirming also the New Urban Agenda, adopted at the United Nations Conference on Housing and Sustainable Urban Development (Habitat III), held in Quito, from 17 to 20 October 2016, [5]

Reaffirming further its vision of cities and human settlements that adopt and implement disaster risk reduction and management, reduce vulnerability, build resilience and responsiveness to natural and human-made hazards and foster mitigation of and adaptation to climate change,

Noting with concern that the El Niño phenomenon has posed a serious challenge to the hard-fought development gains of developing countries, particularly in terms of diverting resources from national development plans and programmes,

Conscious of the importance of enhanced concerted efforts by the World Meteorological Organization with relevant national, regional and international monitoring centres to deliver, effectively and in a timely manner, more regionally focused climate services as well as training and capacity-building related to El Niño/La Niña, and noting the role of the International Research Centre on El Niño at Guayaquil, Ecuador, in this regard,

Recalling that the peak of the 2015/16 El Niño was comparable in strength to the 1982/83 and 1997/98 events and, therefore, one of the strongest on record, and affected more than 60 million people during 2015 and 2016, in particular in developing countries, with significant short- and long-term impacts on the health of individuals, the economy and food production locally, regionally and globally, particularly affecting people whose livelihood depends on agriculture, fisheries and livestock activities,

Noting with concern that, as a consequence of the 2015/16 El Niño phenomenon, heavy rains, floods and, conversely, cold waves and heatwaves, wildfires, coral bleaching and drought episodes adversely affected countries and peoples, in particular in Latin America, Eastern and Southern Africa and South-East Asia and the Pacific,

---

[3] Adopted under the UNFCCC in FCCC/CP/2015/10/Add.1, decision 1/CP.21.

[4] United Nations, *Treaty Series*, vol. 1771, No. 30822.

[5] Resolution 71/256, annex.

including by increasing the spread of diseases and the number of people displaced, affecting food security and infrastructure and hampering the ability of those countries and peoples to achieve sustainable development,

Noting with appreciation that some countries were able to partly reduce the adverse economic, social and environmental impacts of the 2015/16 El Niño phenomenon by designing and implementing government-led early action plans that included the establishment of resilient multipurpose dams and other infrastructure projects, reinforcing existing social and productive infrastructure, revitalizing health services to combat vector-borne diseases, and strengthening social support services, safety nets, appropriate and preventive agriculture practices, income-generating public works and welfare programmes,

Acknowledging the importance of humanitarian assistance provided to countries that were most affected by the adverse effects of the 2015/16 El Niño phenomenon, while stressing the need to transcend this approach in favour of a multidisciplinary and articulated development-based response to strengthen national institutional capacities and effectively address these adverse consequences,

Noting that the World Meteorological Organization has predicted a 70 to 80 per cent chance of a weak El Niño/Southern Oscillation phenomenon prevailing during the winter of 2018/19 and a 55 to 60 per cent chance of its continuing into the spring of 2019 to be the most likely scenario,

Noting also the work of the Special Envoys on El Niño and Climate by the Secretary-General in calling attention to the severe short- and long-term impacts of the 2015/16 El Niño, which culminated in the submission of the report entitled "Preventing El Niño Southern Oscillation episodes from becoming disasters: a blueprint for action",

Noting with appreciation the inclusion of the discussions on the important contributions of science, technology and innovation to building resilience to the socioeconomic and environmental impacts of the El Niño phenomenon held during the multi-stakeholder forums on science, technology and innovation for the Sustainable Development Goals,

Noting that the sixth session of the Global Platform for Disaster Risk Reduction will be held in Geneva, from 13 to 17 May 2019, on the theme "Resilience dividend: towards sustainable and inclusive societies",

Noting also the climate summit called for by the Secretary-General, to be held in New York in 2019,

Reiterating the pledge that no one will be left behind, reaffirming the recognition that the dignity of the human person is fundamental, and the wish to see the Goals and targets met for all nations and peoples and for all segments of society, and recommitting to endeavour to reach the furthest behind first,

Recommitting to ensuring that no country or person is left behind and to focusing our effort where the challenges are greatest, including by ensuring the inclusion and participation of those who are furthest behind,

1. *Takes note* of the reports of the Secretary-General on the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030,[6] which includes a section on an effective global response to address the impacts of the El Niño phenomenon;

[6] A/72/259 and A/73/268.

2. *Urges* the effective implementation of the Sendai Declaration1 and the Sendai Framework for Disaster Risk Reduction 2015–2030;[2]

3. *Reaffirms* the importance of developing multi-hazard strategies at the local, national, subregional, regional and international levels by 2020, in line with Sendai Framework, that aim to prevent, mitigate and repair the adverse economic, social and environmental impacts of the El Niño phenomenon, while recognizing ongoing national initiatives by affected countries to strengthen their capacities;

4. *Recognizes* the continued efforts by the Governments of Ecuador and Spain, the World Meteorological Organization and the United Nations Office for Disaster Risk Reduction to support the International Research Centre on El Niño, and encourages them and other members of the international community to continue to make such contributions for the advancement of the Centre;

5. *Welcomes* the activities undertaken so far to strengthen the International Research Centre on El Niño, through collaboration with international monitoring centres, including national oceanographic institutions, and encourages further efforts to enhance regional and international recognition of and support for the Centre and to develop tools for decision makers and government authorities aimed at reducing the impact of the El Niño phenomenon;

6. *Notes* the assistance provided to Governments by the International Research Centre on El Niño and by other Governments and institutions in the development of early warning systems that allow for the implementation of anticipatory risk reduction measures that contribute to the reduction and prevention of the potential human, economic and environmental impacts of the phenomenon;

7. *Recognizes* the contributions of the United Nations system, namely, the Food and Agriculture Organization of the United Nations, the Office for the Coordination of Humanitarian Affairs of the Secretariat, the United Nations Development Programme, the United Nations Office for Disaster Risk Reduction, the World Food Programme and the Word Meteorological Organization, to guidance on and action planning for El Niño, as a phenomenon that causes impacts of a multisectoral nature, including on food security, livelihood, health and water and sanitation, and encourages strengthened collaboration also with other relevant institutions;

8. *Recognizes also* the technical and scientific support of the World Meteorological Organization in producing regionally coordinated monthly and seasonal forecasts, in particular its establishment of a consensus mechanism for the development of updates on El Niño/I a Niña conditions, which receives contributions from several climate centres, and also recognizes various initiatives undertaken by different countries to strengthen national and regional capac ities;

9. *Encourages* the World Meteorological Organization, in this regard, to continue to strengthen collaboration and the exchange of data and information with relevant institutions;

10. *Encourages* Governments to promote the full, equal and effective participation and leadership of women, as well as of persons with disabilities, in the design, management, resourcing and implementation of gender-responsive and disability-inclusive policies, plans and programmes on the preparation for and response to the El Niño phenomenon, and recognizes in this regard that women and girls are disproportionately exposed to risk, increased loss of livelihoods and even loss of life during and in the aftermath of disasters, and that disasters and the consequent disruption to physical, social, economic and environmental networks and support systems disproportionately affect persons with disabilities and their families;

11. *Stresses* that during neutral El Niño and La Niña years it is critical to prepare for, build resilience to and reduce the risks of the next event, including through integrated plans;

12. *Encourages* responses to the El Niño/La Niña phenomenon not only to address the immediate needs but also to support longer-term sustainable development and build the resilience of livelihoods especially in the agricultural sectors and rural areas;

13. *Calls upon* the international community to provide financial, technical and capacity-building support to countries affected by the El Niño phenomenon, prioritizing resources to developing countries;

14. *Encourages* the United Nations inter-agency task team on science, technology and innovation for the Sustainable Development Goals, the annual multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the Commission on Science and Technology for Development to consider further discussing recommendations on how to better identify requirements and options for the adequate provision of science, technology and innovation elements to enable countries to address the impacts of the El Niño/La Niña phenomenon, as appropriate;

15. *Encourages* the annual Global Infrastructure Forum to identify and address, as appropriate, infrastructure and capacity gaps and needs to enhance preparedness and promote early actions in countries affected by the El Niño/La Niña phenomenon;

16. *Encourages* the sixth session of the Global Platform for Disaster Risk Reduction to include in its discussions ways to enhance preparedness, build resilience, promote early actions, reduce risks and address the impacts of the El Niño/La Niña phenomenon, as appropriate;

17. *Requests* the United Nations system, through existing coordination mechanisms and platforms, to take into consideration, where appropriate, the El Niño/La Niña phenomenon when designing risk reduction and development strategies, in particular in the context of the United Nations Plan of Action on Disaster Risk Reduction for Resilience: Towards a Risk-Informed and Integrated Approach to Sustainable Development;

18. *Encourages* interested Member States, with the support of the United Nations development system, to develop integrated, coherent and comprehensive government-led strategies to mitigate the adverse impacts of the El Niño/La Niña phenomenon and to collaborate in support of affected countries;

19. *Calls upon* the relevant organizations of the United Nations system, within their respective mandates and resources, to ensure that no one is left behind and no country is left behind in the implementation of the present resolution;

20. *Requests* the Secretary-General to include in his report to the General Assembly at its seventy-fourth and seventy-fifth sessions, under the sub-item entitled "Disaster risk reduction" of the item entitled "Sustainable development", a section on the implementation of the present resolution, and decides to consider at its seventy-fifth session the topic "Effective global response to address the impacts of the El Niño phenomenon" under the sub-item entitled "Disaster risk reduction", unless otherwise agreed.

Agenda item 26
Agriculture development, food security and nutrition

Egypt:* revised draft resolution

Agriculture development, food security and nutrition

The General Assembly,

Recalling its resolutions 65/178 of 20 December 2010, 66/220 of 22 December 2011, 67/228 of 21 December 2012, 68/233 of 20 December 2013, 69/240 of 19 December 2014, 70/223 of 22 December 2015, 71/245 of 21 December 2016 and 72/238 of 20 December 2017,

Recalling also the Declaration of the World Summit on Food Security, [1] particularly the Five Rome Principles for Sustainable Global Food Security, and noting the Rome Declaration on Nutrition,[2] as well as the Framework for Action,[3] which provides a set of voluntary policy options and strategies for use by Governments, as appropriate, adopted at the Second International Conference on Nutrition, held in Rome from 19 to 21 November 2014,

Recalling further the Rio Declaration on Environment and Development, [4] Agenda 21, [5] the Programme for the Further Implementation of Agenda 21, [6] the Johannesburg Declaration on Sustainable Development [7] and the Plan of Implementation of the World Summit on Sustainable Development (Johannesburg Plan of Implementation),[8] the Monterrey Consensus of the International Conference

* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

on Financing for Development,[9] the 2005 World Summit Outcome,[10] the Doha Declaration on Financing for Development: outcome document of the Follow-up International Conference on Financing for Development to Review the Implementation of the Monterrey Consensus,[11] the Programme of Action for the Least Developed Countries for the Decade 2011–2020,[12] the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024[13] and the SIDS Accelerated Modalities of Action (SAMOA) Pathway,[14]

Recalling the outcome document of the United Nations Conference on Sustainable Development, held in Rio de Janeiro, Brazil, from 20 to 22 June 2012, entitled "The future we want",[15]

Reaffirming its resolution 70/1 of 25 September 2015, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming also its resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

Welcoming the Paris Agreement,[16] and encouraging all its parties to fully implement the Agreement and parties to the United Nations Framework Convention on Climate Change[17] that have not yet done so to deposit their instruments of ratification, acceptance, approval or accession, where appropriate, as soon as possible,

Highlighting the synergies between the implementation of the 2030 Agenda for Sustainable Development and the Paris Agreement, and noting with concern the scientific findings contained in the special report entitled *Global Warming of 1.5°C* of the Intergovernmental Panel on Climate Change,

Looking forward to the climate summit called for by the Secretary-General, to be held in New York in 2019, to accelerate global action on climate change,

[14] Resolution 69/15, annex.

[15] Resolution 66/288, annex.

[16] Adopted under the UNFCCC in FCCC/CP/2015/10/Add.1, decision 1/CP.21.

[17] United Nations, *Treaty Series*, vol. 1771, No. 30822.

Reaffirming the New Urban Agenda, adopted at the United Nations Conference on Housing and Sustainable Urban Development (Habitat III), held in Quito from 17 to 20 October 2016,[18] and reaffirming also the importance of promoting the integration of food security and the nutritional needs of urban residents, particularly the urban poor, in urban and territorial planning, in order to end hunger and malnutrition, as well as promoting coordination of sustainable food security and agriculture policies across urban, peri-urban and rural areas,

Reaffirming also the importance of supporting the African Union's Agenda 2063, as well as its 10-year plan of action, as a strategic framework for ensuring a positive socioeconomic transformation in Africa within the next 50 years and its continental programme embedded in the resolutions of the General Assembly on the New Partnership for Africa's Development and regional initiatives, such as the Comprehensive Africa Agriculture Development Programme,

Reaffirming further its resolutions 71/243 of 21 December 2016 and 72/279 of 31 May 2018, and welcoming the efforts of the Secretary-General to better position the United Nations operational activities for development to support countries in their efforts to implement the 2030 Agenda for Sustainable Development, and in particular to enhance coordination and urgency in achieving Sustainable Development Goal 2,

Recalling the political declaration of the high-level meeting of the General Assembly on the prevention and control of non-communicable diseases[19] and the outcome document of the high-level meeting of the General Assembly on the comprehensive review and assessment of the progress achieved in the prevention and control of non-communicable diseases,[20] welcoming the third high-level meeting of the General Assembly on the prevention and control of non-communicable diseases, held in New York on 27 September 2018, and its political declaration entitled "Time to deliver: accelerating our response to address non-communicable diseases for the health and well-being of present and future generations" adopted by the Assembly in its resolution 73/2 of 10 October 2018 as a renewal of the commitment to tackle non-communicable diseases, and underscoring the need to make progress on the agreed commitments,

Welcoming the high-level meeting of the General Assembly on the fight against tuberculosis, held in New York on 26 September 2018, and the commitment in its political declaration[21] to the multisectoral action required to address the social and economic factors driving the worldwide tuberculosis epidemic,

Recalling the high-level meeting of the General Assembly on antimicrobial resistance, held in New York on 21 September 2016, and its political declaration, as set out in resolution 71/3 of 5 October 2016, in which the Assembly reaffirmed the global action plan on antimicrobial resistance,[22] developed by the World Health Organization in collaboration with, and subsequently adopted by, the Food and Agriculture Organization of the United Nations and the World Organization for Animal Health,

Recalling also the action plan on antimicrobial resistance 2016–2020 of the Food and Agriculture Organization of the United Nations, which supports the food and agriculture sectors in implementing the global action plan on antimicrobial resistance developed by the World Health Organization in collaboration with, and

[18] Resolution 71/256, annex.
[19] Resolution 66/2, annex.
[20] Resolution 68/300.
[21] Resolutoin 73/3.
[22] World Health Organization, document WHA68/2015/REC/1, annex 3.

subsequently adopted by, the Food and Agriculture Organization of the United Nations and the World Organization for Animal Health,

Expressing concern that the current pace and scope of implementation of Sustainable Development Goal 2 is unlikely to promote the transformational change needed and that its targets will not be achieved in many parts of the world, and calling for additional efforts to support the transformational change needed,

Expressing concern also that the multiple and complex causes of the food crises that occur in different regions of the world, affecting developing countries, especially net food importers, and their consequences for food security and nutrition require a comprehensive and coordinated response in the short, medium and long term by national Governments, civil society, the private sector and the international community, reiterating that the root causes of food insecurity and malnutrition are poverty, growing inequality, inequity and lack of access to resources and income-earning opportunities, the effects of climate change and disasters, and conflicts, and remaining concerned that excessively volatile food prices can pose a serious challenge to the fight against poverty and hunger and to the efforts of developing countries to attain food security and improved nutrition and to achieve internationally agreed development goals, including the Sustainable Development Goals, particularly those related to ending hunger and malnutrition,

Recalling the United Nations strategic plan for forests 2017–2030,[23] acknowledging that forests provide essential ecosystem services, such as timber, food, fuel, fodder, non-wood products and shelter, as well as soil and water conservation and clean air, that sustainable management of forests and trees outside forests is vital to the integrated implementation of the 2030 Agenda for Sustainable Development and that forests prevent land degradation and desertification and reduce the risks of floods, landslides and avalanches, droughts, dust and sand storms and other disasters, and stressing in this regard the role of all types of forests, including boreal, temperate and tropical forests, in providing food security,

Noting the engagement of the Committee on World Food Security in advancing country-led implementation of the 2030 Agenda for Sustainable Development,

Welcoming the outcome of the forty-fifth session of the Committee on World Food Security, held in Rome from 15 to 19 October 2018, taking note of its main outcomes, such as the launch of an inclusive process leading to the development of Committee on Food Security voluntary guidelines on food systems and nutrition, in support of the United Nations Decade of Action on Nutrition (2016–2025), recalling the endorsement by the Committee in 2014 of the voluntary Principles for Responsible Investment in Agriculture and Food Systems[24] and the Committee's Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security,[25] and taking note of the adoption of the policy recommendations on connecting smallholders to markets and on sustainable agricultural development for food security and nutrition, including the role of livestock,

Taking note of the launch of the Sustainable Food Systems Programme under the 10 Year Framework of Programmes on Sustainable Consumption and Production Patterns,[26] an inclusive initiative to accelerate the shift towards more sustainable food systems,

---

[23] See resolution 71/285.

[24] Food and Agriculture Organization of the United Nations, document C 2015/20, appendix D.

[25] Ibid., document CL 144/9 (C 2013/20), appendix D.

[26] A/CONF.216/5, annex.

Recalling the operationalization of the Technology Bank for the Least Developed Countries, which is helping the least developed countries to strengthen their science, technology and innovation capacities and fostering the development of national and regional innovation ecosystems, as well as developing capacities for partnerships in science, technology and innovation collaboration with other countries worldwide,

Noting with appreciation the work undertaken by relevant international bodies and organizations, including the Food and Agriculture Organization of the United Nations, the International Fund for Agricultural Development, the World Food Programme, the World Health Organization, the United Nations Children's Fund and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), on agricultural development and on enhancing food security and food safety and improving nutrition outcomes,

Recalling the declaration of 2016–2025 as the United Nations Decade of Action on Nutrition, based on the Rome Declaration on Nutrition and the Framework for Action, and the call upon the Food and Agriculture Organization of the United Nations and the World Health Organization to implement a work programme for 2016–2025, taking into account contributions from relevant stakeholders, including the private sector, using coordinating mechanisms such as the Standing Committee on Nutrition and multi-stakeholder platforms such as the Committee on World Food Security,

Welcoming the adoption of its resolution 72/239 of 20 December 2017, in which it proclaimed 2019–2028 the United Nations Decade of Family Farming, which raised the profile of the role of family farming in contributing to the implementation of the 2030 Agenda for Sustainable Development and to the achievement of food security and improved nutrition,

Reaffirming that agriculture remains a fundamental and key sector for developing countries, and noting the importance of working towards eliminating all forms of protectionism,

Acknowledging the importance of promoting sustainable farming and agriculture, which will contribute to sustainable food production systems and the conservation of biodiversity and ecosystems and help to eradicate hunger and malnutrition,

Bearing in mind that the agriculture sector depends heavily on biodiversity and its components, as well as on the ecosystem functions and services which biodiversity underpins, and that these sectors also have an impact on biodiversity in various direct and indirect ways, as acknowledged in the Cancun Declaration on Mainstreaming the Conservation and Sustainable Use of Biodiversity for Well-being,

Reaffirming the right of everyone to have access to safe, sufficient and nutritious food, consistent with the right to adequate food and the fundamental right of everyone to be free from hunger, so as to be able to fully develop and maintain their physical and mental capacities, and underlining the need to make special efforts to meet nutritional needs, especially of women, children, older persons, indigenous peoples and persons with disabilities, as well as of those living in vulnerable situations,

Taking note with appreciation of the publications entitled *The State of Food Security and Nutrition in the World 2018: Building Climate Resilience for Food Security and Nutrition*, issued by the Food and Agriculture Organization of the United Nations, the World Health Organization, the International Fund for Agricultural Development, the World Food Programme and the United Nations Children's Fund, and *The State of Food and Agriculture 2018: Migration, Agriculture and Rural Development*, issued by the Food and Agriculture Organization of the United Nations,

Remaining deeply concerned that, according to the most recent estimates of the Food and Agriculture Organization of the United Nations, the World Food Programme, the International Fund for Agricultural Development, the World Health Organization and the United Nations Children's Fund, the number of chronically undernourished people in the world increased to nearly 821 million in 2017, from around 804 million in 2016, and that global nutrition challenges are increasingly complex as multiple forms of malnutrition, including stunting, wasting, underweight, micronutrient deficiencies, overweight and obesity, may coexist within the same country or household,

Recognizing that economic slowdown, gender inequalities, conflict, drought and the adverse effects of climate change, including more frequent and extreme weather events, are among the key factors contributing to a reversal in the long-term progress in fighting global hunger, making the prospect of ending hunger and all forms of malnutrition by 2030 more difficult,

Remaining deeply concerned about the continuing food insecurity and malnutrition being faced by hundreds of millions of people, in particular in sub-Saharan Africa and in South and West Asia,

Recognizing the need to prevent the recurrence in the future of deaths of people from famine,

Expressing its concern about the growing number of obese adults in the world, from 563.7 *million* in 2012 to 672.3 million in 2016,

Expressing its concern also that, according to the *Global Report on Food Crises 2018*, the number of people facing crisis-level food insecurity or worse has increased dramatically, up from almost 108 million in 2016 to 124 million in 2017 in countries affected by, inter alia, conflict and exacerbated by climate-related events, environmental factors, including natural disasters, and excessive food price volatility,

Noting that an increasing number of countries, in particular in Africa, Asia, Latin America and the Pacific, are integrating food security and nutrition into their agriculture policies and investment plans and that, as a result, eradicating hunger, improving food security and ensuring adequate nutrition are being given greater prominence in regional development strategies, such as the African Union Malabo Declaration on Accelerated Agricultural Growth and Transformation for Shared Prosperity and Improved Livelihoods, the Association of Southeast Asian Nations food security and nutrition strategy, the Piura Declaration on Food Security, the Framework for Multi-Year Programme on Food Security and Climate Change and the Strategic Framework on Rural-Urban Development to Strengthen Food Security and Quality Growth, adopted by the Asia-Pacific Economic Cooperation, the Hunger-Free Latin America and the Caribbean 2025 Initiative, the strategy on food security and nutrition of the Community of Portuguese-speaking Countries and the Arab food security initiative, all of which emphasized the importance of investing in agriculture, diversifying food production and diets and providing quality nutritional education to consumers, introducing labour-saving technologies in food production and processing, enhancing women's access to income and strengthening capacity-building in improving food safety at all stages of the food chain, and noting also the establishment of the Islamic Organization for Food Security, headquartered in Astana,

Reiterating the urgent need for action to address the adverse effects of climate change on food security, in particular for women, youth, older persons and persons with disabilities, as well as the other root causes of food insecurity and all forms of malnutrition,

Expressing concern that climate change will disproportionately impact the most vulnerable people, especially women and children, and their livelihoods, ultimately

putting hundreds of millions of people at risk, and that by 2050, the risk of hunger and child malnutrition could increase by up to 20 per cent owing to climate change,

Reiterating the importance of gender equality and the empowerment of women and girls, as well as the recognition and protection of the rights of small-holders, particularly women, reiterating also the importance, inter alia, of empowering rural women, youth, small-scale farmers, family farmers and livestock farmers, fishers and fish workers as critical agents for enhancing agricultural and rural development and food security and for improving nutrition outcomes, and acknowledging their fundamental contribution to the environmental sustainability and the genetic preservation of agricultural systems and to sustaining productivity on often marginal lands,

Recognizing that livestock contributes 40 per cent of the global value of agricultural output and supports the livelihoods and food security of almost 1.3 billion people, and in this regard acknowledging that the sector offers opportunities for sustainable agricultural development, poverty eradication and food security gains, and offers an opportunity for raising climate awareness,

Acknowledging that social protection programmes and measures are effective in reducing poverty and hunger,

Recognizing the importance of initiatives under the United Nations system, including the observance of World Pulses Day, World Tuna Day, Sustainable Gastronomy Day, World Bee Day, World Food Safety Day, World Soil Day, the International Year of Camelids, the International Year of Plant Health, the International Decade for Action, "Water for Sustainable Development" and the United Nations Decade of Family Farming (2019–2028), aimed at increasing public awareness of relevant agriculture, food security and nutritional benefits, in accordance with General Assembly resolutions 53/199 of 15 December 1998 and 61/185 of 20 December 2006 on proclamation of international years and Economic and Social Council resolution 1980/67 of 25 July 1980 on international years and anniversaries,

Recognizing also the need to increase responsible public and private investment in the agriculture sector, inter alia, to find inclusive solutions to and fight hunger and malnutrition and to promote rural and urban sustainable development,

Recalling the Sendai Framework for Disaster Risk Reduction 2015–2030 and its guiding principles, [27] and recalling also its promotion of regular disaster preparedness, response and recovery exercises, at the national and local levels, with a view to ensuring rapid and effective response to disasters and related displacement, including access to essential food and non-food relief supplies, as appropriate to local needs,

Noting the Committee on World Food Security Framework for Action for Food Security and Nutrition in Protracted Crises, the Committee's policy recommendations on sustainable fisheries and aquaculture for food security and nutrition and its policy recommendations on food losses and waste in the context of sustainable food systems,

Recalling that the Sustainable Development Goals and targets are integrated and indivisible and balance the three dimensions of sustainable development, and acknowledging that reaching Goal 2 and the interlinked targets of other Goals will be critical, inter alia, in ending hunger and all forms of malnutrition,

Reiterating the pledge that no one will be left behind, reaffirming the recognition that the dignity of the human person is fundamental, and the wish to see

[27] Resolution 69/283, annex II.

the Goals and targets met for all nations and peoples and for all segments of society, and recommitting to endeavour to reach the furthest behind first,

Recommitting to ensuring that no country or person is left behind and to focusing our effort where the challenges are greatest, including by ensuring the inclusion and participation of those who are furthest behind,

1. *Takes note* of the report of the Secretary-General;[28]

2. *Stresses* the importance of continued consideration of the issue of agriculture development, food security and nutrition, and encourages Member States and relevant stakeholders to give due consideration to this issue while implementing the internationally agreed development goals, in particular the 2030 Agenda for Sustainable Development[29] and its Sustainable Development Goals;

3. *Emphasizes* that sustainable agricultural production, food security, food safety and nutrition are key elements for the eradication of poverty in all its forms and dimensions, and calls for greater efforts to sustainably enhance the agricultural production capacities, productivity and food security of developing countries;

4. *Also emphasizes* the need to accelerate and scale up action, as appropriate, to strengthen the resilience and adaptive capacity of food systems and people's livelihoods in response to climate variability and extremes, to achieve a world without hunger and malnutrition in all its forms by 2030;

5. *Expresses concern* that the world is not on track to eradicate hunger and malnutrition by 2030 and that scarce and unsustainably managed natural resources, combined with insecure and uneven tenure rights for smallholders, are severely affecting those in vulnerable situations in rural areas, that climate change, including the adverse impact of sea level rise, drought, desertification and conflict and post-conflict situations are challenges with regard to food security and nutrition and diet-related non-communicable diseases in many places, preventing progress in the implementation of the Sustainable Development Goals, and that countries in protracted crises are at risk of being left behind;

6. *Stresses* that urgent and concerted action is needed at all levels to recover momentum and accelerate efforts to end hunger and all forms of malnutrition, comprehensively tackling both its causes and effects, and to promote improved nutrition and sustainable agriculture and food systems;

7. *Reiterates* the importance of developing countries determining their own food security strategies, that improving food security and nutrition is a global challenge and a national policy responsibility and that any plans for addressing this challenge in the context of eradicating poverty must be nationally articulated, designed, owned, led and built in consultation, as an inclusive process, with all key stakeholders at the national level, as appropriate, and urges Member States, especially those affected, to make food security, food safety and nutrition a high priority and to reflect this in their national programmes and budgets;

8. *Calls upon* the international community to continue its support for the implementation of the Comprehensive Africa Agriculture Development Programme and its results framework, which is an integral component of the Programme that provides guidance on planning and implementing investment programmes;

9. *Encourages* Member States, in designing their national policies, to fully take into account the Rome Declaration on Nutrition2 as well as the Framework for

[28] A/73/293.

[29] Resolution 70/1.

Action,[3] which provides a set of voluntary policy options and strategies for the use of Governments, as appropriate;

10. *Urges* increased political commitment by Member States to end hunger and all forms of malnutrition, notes in this regard the Scaling Up Nutrition movement, and encourages Member States to engage in the movement at the global and country levels to reduce the increasing level in global hunger and all forms of malnutrition, in particular among children, especially children under the age of 2, women, especially those who are pregnant and lactating, and youth;

11. *Underscores* the need to address child stunting, which remains unacceptably high, with nearly 151 million children under 5 years of age, or over 22 per cent, affected by stunting in 2017;

12. *Emphasizes* the six global nutrition targets set by the World Health Assembly to address global malnutrition and the related monitoring framework;

13. *Takes note* of the Global Nutrition for Growth Compact, signed by more than 100 countries, companies and civil society organizations, to reduce the number of stunted children by 20 million by 2020 and the financial commitments made to support this goal, as well as the third Nutrition for Growth Summit, held in Milan, Italy, in November 2017;

14. *Stresses* the need to increase sustainable agricultural production and productivity globally, noting the diversity of agricultural conditions and systems, including by improving and aiming to ensure the functioning of markets and trading systems and strengthening international cooperation, particularly for developing countries, and by increasing responsible public and private investment in sustainable agriculture, land management and rural development, as well as collaboration in science, technology and innovation, and notes that the benefit of such public and private investment and engagement should also reach, where appropriate, local smallholders in appropriate knowledge management systems and communications systems with regard to promoting food security, improving nutrition outcomes and reducing inequality;

15. *Recognizes* the need to increase the resilience and sustainability of food and agricultural production with regard to climate change in the context of the rising demand for crops, bearing in mind the importance of safeguarding food security and ending hunger and the particular vulnerabilities of food production systems to the adverse impacts of climate change, and encourages efforts at all levels to support climate-sensitive agricultural practices, including agroforestry, agroecology, conservation agriculture, water management schemes, drought-and flood-resistant seeds and sustainable livestock management, and to establish and strengthen interfaces between scientists, decision makers, entrepreneurs and funders of science, technology and innovation, as well as measures to strengthen the resilience of those in vulnerable situations and of food systems, which can also have a wider positive impact, emphasizing adaptation to climate change as a major concern and objective for all farmers and food producers, especially small-scale producers;

16. *Reaffirms* the need to promote, enhance and support more sustainable agriculture, including crops, forestry, fisheries and aquaculture, that improves food security, eradicates hunger, helps to prevent malnutrition and is economically viable, while conserving land, water, plant and animal genetic resources, biodiversity and ecosystems and enhancing resilience to climate change and natural disasters, and recognizes the need to maintain natural ecological processes that support sustainable and efficient food production systems and ensure food security, underlines the importance of mainstreaming conservation and sustainable use of biodiversity in the agriculture sector, and takes note of the importance of the Globally Important

Agricultural Heritage Systems and the Biodiversity Mainstreaming Platform promoted by the Food and Agriculture Organization of the United Nations;

17. *Expresses concern* about antimicrobial resistance, in particular in the agricultural sector, and in this regard encourages the implementation of the action plan on antimicrobial resistance 2016–2020 of the Food and Agriculture Organization of the United Nations, which supports the food and agriculture sectors in implementing the global action plan on antimicrobial resistance[22] developed by the World Health Organization in collaboration with, and subsequently adopted by, the Food and Agriculture Organization of the United Nations and the World Organization for Animal Health, in order to minimize the impact of antimicrobial resistance;

18. *Recognizes* that sustainable food systems have a fundamental role to play in promoting healthy diets and improving nutrition and preventing and controlling non-communicable diseases, and welcomes the formulation and implementation of internationally consistent national policies aimed at eradicating malnutrition in all its forms and transforming food systems so as to make nutritious diets available to all, while reaffirming that health, water and sanitation systems must be strengthened simultaneously to end malnutrition;

19. *Calls for* closing the gender gap in access to productive resources in agriculture, noting with concern that the gender gap persists with respect to many assets, inputs and services, and stresses the need to invest in and strengthen efforts to empower women, in particular rural women, to address their own food and nutritional needs and those of their families, to promote adequate standards of living for them, as well as decent conditions of work, and to guarantee their personal health, well-being and security, full access to land and natural resources and access to local, regional and global markets;

20. *Recognizes* the critical role and contribution of rural women, including smallholders and women farmers, and indigenous women and women in local communities, and their traditional knowledge in enhancing agricultural and rural development, improving food security and eradicating rural poverty, and in this regard stresses the importance of reviewing agricultural policies and strategies to ensure that the critical role of women in food security and nutrition is recognized and addressed as an integral part of both short- and long-term responses to food insecurity, malnutrition, potential excessive price volatility and food crises in developing countries, as well as of the recognition and protection of the rights of smallholders, in particular women;

21. *Reaffirms* the crucial role of healthy marine ecosystems, sustainable fisheries and sustainable aquaculture in enhancing food security and access to safe, sufficient and nutritious food and in providing for the livelihoods of millions of people, particularly inhabitants of small island developing States, and in this regard encourages the full implementation of the Global Action Programme on Food Security and Nutrition in Small Island Developing States, which was launched on 4 July 2017;

22. *Encourages and recognizes* the efforts at all levels to establish and strengthen social protection measures and programmes, including national safety nets and protection programmes for the needy and vulnerable, such as food and cash-for-work, cash transfer and voucher programmes, school feeding programmes and mother-and-child nutrition programmes, and in this regard underlines the importance of increasing investment, capacity-building and systems development;

23. *Remains deeply concerned* about the recurring food insecurity and malnutrition in different regions of the world and their ongoing negative impact on health and nutrition, especially in sub-Saharan Africa and South and West Asia, and

in this regard underlines the urgent need for joint efforts at all levels to respond to the situation in a coherent and effective manner;

24. *Recognizes* the important role of indigenous peoples and local communities, small-scale farmers, family farmers, livestock farmers, small-scale fishers and fish workers and their traditional knowledge and seed supply systems, as well the important role of new technologies in the conservation of biodiversity and in aiming to ensure food security and improved nutrition;

25. *Stresses* the importance of the application of science, technology and innovation and related knowledge management and communications systems in ensuring food security by 2030, and encourages the adoption of the most advanced and appropriate information technology, such as the Internet, mobile platforms, meteorology, big data and cloud computing, in agriculture systems in order to support the efforts of smallholder and family farmers to increase their resilience, productivity and incomes and include them in the development of research and innovation agendas;

26. *Emphasizes* the need to revitalize the agriculture sector, promote rural development and aim for ensuring food security and nutrition, notably in developing countries, in a sustainable manner, which will contribute to achieving the Sustainable Development Goals, and underlines the importance of taking the necessary actions to better address the needs of rural communities by, inter alia, enhancing access for agricultural producers, in particular small producers, women, youth, indigenous peoples and local communities, persons with disabilities and older persons, in conflict and post-conflict situations, to credit and other financial services, markets, secure land tenure, health-care services, social services, education, training, knowledge and appropriate and affordable technologies, including for development of local crops, efficient irrigation, reuse of treated wastewater and water harvesting and storage;

27. *Recognizes* that, by 2050, the world urban population is expected to nearly double, making urbanization one of the most transformative trends of the twenty-first century, underscoring the growing need to take action to fight hunger and malnutrition among the urban poor through promoting the integration of the food security and nutrition needs of urban residents, in particular the urban poor, in urban and territorial planning, to end hunger and malnutrition, promoting the coordination of sustainable food security and agriculture policies across urban, peri-urban and rural areas to facilitate the production, storage, transport and marketing of food to consumers in adequate and affordable ways, to reduce food losses and to prevent and reuse food waste, and promoting the coordination of food policies with energy, water, health, transport and waste and other policies in urban areas to maximize efficiencies and minimize waste;

28. *Reaffirms* the need to strive for a comprehensive twin-track approach to food security and nutrition that consists of direct action to immediately tackle hunger for the most vulnerable and medium- and long-term sustainable agriculture, food security and nutrition and rural development programmes to eliminate the root causes of hunger and poverty, including through the progressive realization of the right to adequate food in the context of national food security;

29. *Also reaffirms* the need to promote a significant expansion of research on food, nutrition and agriculture, extension services, training and education, and of funding for such research from all sources, to improve agricultural productivity and sustainability in order to strengthen agriculture as a key sector, to promote development and to build up resilience to support better recovery from crisis, including by strengthening the work of the reformed Consultative Group on International Agricultural Research so as to enhance its development impact, supporting national research systems, public universities and research institutions and

promoting technology transfer on mutually agreed terms, the voluntary sharing of knowledge and practices and research to adapt to climate change and improve equitable access to research results and technologies on mutually agreed terms at the national, regional and international levels, while giving due consideration to the preservation of genetic resources;

30. *Stresses* that a universal, rules-based, open, non-discriminatory and equitable, multilateral trading system will promote agriculture and rural development in developing countries and contribute to world food security and nutrition, and urges national, regional and international strategies to promote the inclusive participation of farmers and fishers and fish workers, especially small-scale farmers, including women, in community, national, regional and international markets;

31. *Recognizes* the efforts made by Member States and United Nations agencies that have already announced their commitments to the United Nations Decade of Action on Nutrition (2016–2025), and encourages all relevant stakeholders to actively support the implementation of the Decade, including by making commitments and establishing action networks;

32. *Looks forward to* the upcoming commencement of the United Nations Decade of Family Farming (2019–2028), and in this regard encourages the full implementation of resolution 72/239, which supports the development, improvement and implementation of public policies on family farming;

33. *Stresses* the need to continue to strengthen cooperation and coordination among the Food and Agriculture Organization of the United Nations, the International Fund for Agricultural Development, the World Food Programme, the World Health Organization, the regional commissions and all other relevant entities of the United Nations system and other intergovernmental organizations, international financial institutions and international trade and economic institutions, including with the support of the Secretary-General's High-level Task Force on Global Food and Nutrition Security in accordance with their respective mandates, in order to increase their effectiveness, as well as to strengthen cooperation between these organizations and with non-governmental organizations and the public and private sectors in promoting and strengthening efforts towards sustainable agriculture development, food security and nutrition;

34. *Notes* the International Fund for Agricultural Development initiative of organizing the first International Conference on South-South and Triangular Cooperation, on the theme "Leveraging Innovations from the Global South to Support Rural Transformation", held in Brasilia on 20 and 21 November 2017;

35. *Looks forward* to the Second High-level United Nations Conference on South-South Cooperation, to be held in Buenos Aires from 20 to 22 March 2019;

36. *Recognizes* the contribution made thus far by early warning systems, and underlines that the reliability and timeliness of such systems should be further strengthened at the national, regional and international levels, with a focus on countries that are particularly vulnerable to price shocks and food emergencies;

37. *Reaffirms* the important role and inclusive nature of the Committee on World Food Security as a major intergovernmental platform for a broad range of stakeholders to work together towards ensuring food security and nutrition for all, and notes the three main functions of policy convergence, lesson-sharing and progress review that the Committee performs in support of the integrated implementation of the Sustainable Development Goals, particularly those related to ending hunger and malnutrition;

38. *Encourages* countries to give due consideration to the dissemination, promotion and implementation of the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security,[25] as well as the voluntary Principles for Responsible Investment in Agriculture and Food Systems,[24] as endorsed by the Committee on World Food Security in 2012 and 2014, respectively;

39. *Also encourages* countries to fully engage in the ongoing development of the Committee on Food Security voluntary guidelines on food systems and nutrition supporting the transformation towards more sustainable food systems that safeguard the health and nutrition of populations;

40. *Further encourages* countries to give due consideration to the dissemination, promotion and implementation of the Voluntary Guidelines to Support the Progressive Realization of the Right to Adequate Food in the Context of National Food Security, adopted by the Council of the Food and Agriculture Organization of the United Nations in 2004,[30] as well as the United Nations strategic plan for forests 2017–2030 adopted by the General Assembly in 2017;[31]

41. *Calls upon* the relevant organizations of the United Nations system, within their respective mandates and resources, to ensure that no one is left behind, and no country is left behind in the implementation of the present resolution;

42. *Requests* the Secretary-General to submit to the General Assembly at its seventy-fourth session a report on the implementation of the present resolution, and decides to include in the provisional agenda of its seventy-fourth session the item entitled "Agriculture development, food security and nutrition", unless otherwise agreed.

Seventy-third session
Second Committee
Agenda item 25 (a)
Operational activities for development: operational activities for development of the United Nations system

Egypt:* revised draft resolution

Operational activities for development of the United Nations system

The General Assembly,

Reaffirming resolution 71/243 of 21 December 2016 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, including its general guidelines,

Reaffirming also its resolution 72/279 of 31 May 2018 on the repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system,

Reaffirming further its resolution 70/1 of 25 September 2015, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming its resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

Please recycle

Welcoming the Paris Agreement,[1] and encouraging all its parties to fully implement the Agreement, and parties to the United Nations Framework Convention on Climate Change[2] that have not yet done so to deposit their instruments of ratification, acceptance, approval or accession, where appropriate, as soon as possible,

Reaffirming the importance of the quadrennial comprehensive policy review of operational activities, through which the General Assembly establishes key system-wide strategic policy orientations and operational modalities for the development cooperation and country-level modalities of the United Nations development system,

1. *Takes note with appreciation* of the reports of the Secretary-General on the system-wide implementation of General Assembly resolution 71/243,[3] and welcomes his efforts on the repositioning of the United Nations development system;

2. *Requests* the Secretary-General and all entities of the United Nations development system to ensure full implementation of General Assembly resolutions 71/243 and 72/279, and stresses the urgency of implementing the mandates contained in paragraphs 4, 15, 19, 29, and 30 of its resolution 72/279, on which reporting is required at the operational activities for development segment of the Economic and Social Council session in May 2019;

3. *Stresses* the need to fully operationalize the three funding sources set out in paragraph 10 of its resolution 72/279, emphasizing that adequate, predictable and sustainable funding of the resident coordinator system remains a concern and is essential to delivering a coherent, effective, efficient and accountable response in accordance with national needs and priorities, and requests the Secretary-General to ensure independent and transparent management of the dedicated trust fund established for the reinvigorated resident coordinator system;

4. *Strongly urges* all Member States to provide voluntary contributions to the dedicated trust fund for the reinvigorated resident coordinator system in a timely manner for the inception period;

5. *Emphasizes* the need to ensure full achievement of the efficiency gains envisioned in the report of the Secretary-General[4] in a timely manner and to redeploy these efficiency gains for development activities, including coordination;

6. *Calls upon* the relevant organizations of the United Nations system, within their respective mandates and resources, to ensure that no one is left behind and no country is left behind in the implementation of the present resolution;

7. *Requests* the Secretary-General to report to the Economic and Social Council on progress made in the implementation of the mandates contained in its resolutions 71/243 and 72/279, as part of his annual reporting to the Council at the operational activities for development segment of its 2019 session, and to the General Assembly at its seventy-fourth session for its further consideration and to inform the next cycle of the quadrennial comprehensive policy review, to be launched in 2020;

8. *Decides* to include in the provisional agenda of its seventy-fourth session, under the item entitled "Operational activities for development", the sub-item entitled "Operational activities for development of the United Nations system".

Seventy-third session
Second Committee
Agenda item 24 (a)
Eradication of poverty and other development issues: implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)

Egypt:* revised draft resolution

Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)

The General Assembly,

Recalling its resolution 72/233 of 20 December 2017 and all other resolutions related to the eradication of poverty,

Reaffirming its resolution 70/1 of 25 September 2015, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions – economic, social and environmental — in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming also its resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

Welcoming the Paris Agreement,[1] and encouraging all its parties to fully implement the Agreement, and parties to the United Nations Framework Convention

* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

Please recycle

on Climate Change[2] that have not yet done so to deposit their instruments of ratification, acceptance, approval or accession, where appropriate, as soon as possible,

Highlighting the synergies between the implementation of the 2030 Agenda for Sustainable Development and the Paris Agreement, and noting with concern the scientific findings contained in the special report entitled *Global Warming of 1.5°C* of the Intergovernmental Panel on Climate Change,

Looking forward to the climate summit called for by the Secretary-General, to be held in New York in 2019, to accelerate global action on climate change,

Reaffirming the New Urban Agenda, adopted at the United Nations Conference on Housing and Sustainable Urban Development (Habitat III), held in Quito, from 17 to 20 October 2016,[3]

Recalling the 2005 World Summit Outcome[4] and the outcome document of the United Nations Conference on Sustainable Development, entitled "The future we want",[5]

Taking note of Economic and Social Council resolution 2011/37 of 28 July 2011, entitled "Recovering from the world financial and economic crisis: a Global Jobs Pact", of the ministerial declaration adopted at the high-level segment of the substantive session of 2012 of the Council,[6] which called for increased efforts to enhance coordination at all levels with a view to strengthening national development strategies, investing in productive capacities, helping to start and grow business and promoting opportunities for full and productive employment and decent work for all, and of the integration segment of the 2017 session of the Council, which was convened under the theme "Eradicating poverty in all its forms and dimensions through promoting sustainable development, expanding opportunities and addressing related challenges", and taking note of the outcomes of that integration segment, including the notion that poverty eradication and pro-poor principles are among the main goals of national agendas or long-term national strategies, as stated by countries during the 2017 session,

Recalling the Monterrey Consensus of the International Conference on Financing for Development[7] and the Doha Declaration on Financing for Development: outcome document of the Follow-up International Conference on Financing for Development to Review the Implementation of the Monterrey Consensus,[8]

Acknowledging, in this regard, the efforts to implement the Addis Ababa Action Agenda, welcoming the convening of the third Economic and Social Council forum on financing for development follow-up in April 2018, recalling its intergovernmentally agreed conclusions and recommendations,[9] taking note of the 2018 report of the Inter-Agency Task Force on Financing for Development, noting

---

[2] United Nations, *Treaty Series*, vol. 1771, No. 30822.

[3] Resolution 71/256, annex.

[4] Resolution 60/1.

[5] Resolution 66/288, annex.

[6] See *Official Records of the General Assembly, Sixty-seventh Session, Supplement No. 3* (A/67/3/Rev.1), chap. IV, sect. F.

[7] *Report of the International Conference on Financing for Development, Monterrey, Mexico, 18–22 March 2002* (United Nations publication, Sales No. E.02.II.A.7), chap. I, resolution 1, annex.

[8] Resolution 63/239, annex.

[9] See E/FFDF/2018/3.

that progress can be reported in all seven action areas of the Addis Ababa Action Agenda, while acknowledging that many implementation gaps remain, and stressing the need for continued substantive deliberation on the implementation of the Addis Ababa Action Agenda in the forum as the designated mechanism to follow up on the financing for development outcomes,

Recalling its resolution 71/243 of 21 December 2016 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, and its resolution 72/279 of 31 May 2018 on repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system,

Welcoming the adoption of the Sendai Framework for Disaster Risk Reduction 2015–2030 at the Third United Nations World Conference on Disaster Risk Reduction, held in Sendai, Japan, from 14 to 18 March 2015,[10] and recognizing the links between disaster resilience and poverty eradication,

Taking note of the adoption of the Nairobi Maafikiano on 22 July 2016, during the fourteenth session of the United Nations Conference on Trade and Development, held in Nairobi from 17 to 22 July 2016,[11] reaffirming the role of the Conference as the focal point within the United Nations system for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development, and recognizing that trade and development can contribute to the eradication of poverty and that the Conference therefore has a role to play in the implementation of the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda,

Concerned at the global and multifaceted nature of poverty and inequality, underlining the fact that the eradication of poverty in all its forms and dimensions, including extreme poverty, and of hunger is an ethical, social, political, environmental and economic imperative of all humankind, and in this regard recognizing that there is a need to better understand and address the multidimensional nature of development and poverty in a multifaceted and integrated approach,

Reaffirming that each country faces specific challenges in its pursuit of sustainable development, that the most vulnerable countries and, in particular, African countries, the least developed countries, landlocked developing countries and small island developing States deserve special attention, as do countries in situations of conflict and post-conflict countries, and that there are also serious challenges within many middle-income countries,

Deeply concerned that poverty acts as a serious impediment to the achievement of gender equality and the empowerment of all women and girls and that the feminization of poverty persists, stressing the importance of giving women equal rights with men to economic resources, including access to ownership and control over land and other forms of property, credit, inheritance, natural resources and appropriate new technology, reaffirming that women play a critical role in development, contribute to structural transformation and are key contributors to the economy and to combating poverty and inequalities and that their full, effective and equal participation in decision-making and the economy is vital in order to achieve sustainable development and significantly enhance economic growth and productivity, recognizing that the economic and social losses due to a lack of progress in achieving gender equality and women's and girls' empowerment are significant and that it is therefore critical that our policies and actions are not just gender-responsive but actively seek to advance the goal of gender equality and women's and

[10] Resolution 69/283, annex II.

[11] TD/519/Add.2 and TD/519/Add.2/Corr.1.

girls' empowerment, and reaffirming that gender equality and the empowerment of all women and girls will make a crucial contribution to progress in realizing the 2030 Agenda for Sustainable Development and are critical factors in the eradication of poverty,

Recognizing that, after the latest global financial crisis, the global economy is still facing difficult macroeconomic conditions, low commodity prices, subdued trade growth and volatile capital flows, that, notwithstanding the impact of the financial crisis, financial flows and developing countries' share in world trade have continued to increase, that these advances have contributed towards a substantial reduction in the number of people living in extreme poverty, and that, despite these gains, many countries still face considerable challenges,

Underlining that the Third United Nations Decade for the Eradication of Poverty (2018–2027) on the theme "Accelerating global actions for a world without poverty", will be important for maintaining the momentum generated by the implementation of the Second Decade towards poverty eradication and ensuring that markets work better for people living in poverty,

Reaffirming that climate change is one of the greatest challenges of our time, that its adverse impacts undermine the ability of all countries to achieve sustainable development, that increases in global temperature, sea level rise, ocean acidification and other climate change impacts are seriously affecting coastal areas and low-lying coastal countries, including many least developed countries and small island developing States, and that the survival of many societies and of the biological support systems of the planet is at risk, which further threatens food security and efforts to eradicate poverty and achieve sustainable development, and thus requires urgent action to maintain, preserve and sustain the development gains achieved in the past decades,

Urging all countries that have not yet done so to ratify and accede to the United Nations Convention against Corruption, [12] encouraging parties to review its implementation, committing to making the Convention an effective instrument to deter, detect, prevent and counter corruption and bribery, prosecute those involved in corrupt activities and recover and return stolen assets to their country of origin, as appropriate, encouraging the international community to develop good practices on asset return, expressing support to the Stolen Asset Recovery Initiative of the United Nations and the World Bank and other international initiatives that support the recovery of stolen assets, urging that regional conventions against corruption be updated and ratified, and striving to eliminate safe havens that create incentives for the transfer abroad of stolen assets and illicit financial flows,

Committed to working to strengthen regulatory frameworks at all levels to further increase the transparency and accountability of financial institutions and the corporate sector, as well as public administrations, and to strengthening international cooperation and national institutions to combat money-laundering and the financing of terrorism,

Reaffirming that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge facing the world today and an indispensable requirement for sustainable development, particularly in Africa, in least developed countries, in small island developing States, and in some middle-income countries, and underlining the importance of accelerating sustainable, inclusive and equitable economic growth and sustainable development, including full, productive

[12] United Nations, *Treaty Series*, vol. 2349, No. 42146.

employment and decent work for all, with a view to reducing inequalities within and among countries,

Recognizing the importance of supporting countries in their efforts to eradicate poverty in all its forms and dimensions, including extreme poverty, and to promote the empowerment of the poor and people in vulnerable situations, including women, children and youth, indigenous peoples and local communities, older persons, persons with disabilities, migrants, refugees and internally displaced persons,

Underlining the primary responsibility of Member States to promote universal health coverage that comprises universal and equitable access to quality health services and ensures affordable and quality service delivery, especially through primary health care and social protection mechanisms, with the support of enhanced international cooperation and with a view to providing access to health services for all, including those who are vulnerable or marginalized, and underlining also that women and children are particularly affected by disasters and outbreaks,

Recognizing the centrality of mobilizing financial and non-financial resources for development at the national and international levels and the effective use of those resources, as well as the importance of policy coherence and a coordinated approach that involves participation at all levels by all actors to promote an enabling environment for sustainable development, and of reinvigorating the global partnership for sustainable development in support of the achievement of the internationally agreed development goals, including the 2030 Agenda for Sustainable Development, which builds upon the unfinished business of the Millennium Development Goals,

Underscoring that, for all countries, public policies and the mobilization and effective use of domestic resources, underscored by the principle of national ownership, are central to the common pursuit of sustainable development, including achieving the Sustainable Development Goals, and recognizing that domestic resources are first and foremost generated by economic growth, supported by an enabling environment at all levels, including well-functioning, efficient and transparent tax systems,

Reaffirming the need to promote private and public investment with the aim of ensuring universal access to affordable, reliable, sustainable and modern energy for all in order to achieve poverty eradication,

Acknowledging the important role that multi-stakeholder partnerships, including the private sector, can play in generating new investments, employment and financing for development,

Taking into consideration that official development assistance remains an important source of financing for development in developing countries,

Acknowledging that South-South cooperation is not a substitute for, but rather a complement to, North-South cooperation, and recognizing the contributions of South-South and triangular cooperation to the efforts of developing countries to eradicate poverty and pursue sustainable development,

Looking forward to the second High-level United Nations Conference on South-South Cooperation, to be held in Buenos Aires from 20 to 22 March 2019,

Emphasizing the essential role of inclusive and sustainable industrial development as part of a comprehensive strategy of structural economic transformation in eradicating poverty and supporting sustained economic growth and thus in contributing to achieving sustainable development in developing countries,

Taking note of the work done under the inter-agency, system-wide plan of action for poverty eradication coordinating the efforts of the United Nations system in its advisory and programmatic support to Member States, involving more than 21 agencies, funds, programmes and regional commissions, and encouraging the alignment of that work with the implementation of the 2030 Agenda for Sustainable Development,

Reiterating the pledge that no one will be left behind, reaffirming the recognition that the dignity of the human person is fundamental, and the wish to see the Goals and targets met for all nations and peoples and for all segments of society, and recommitting to endeavour to reach the furthest behind first,

Recommitting to ensuring that no country or person is left behind and to focusing our effort where the challenges are greatest, including by ensuring the inclusion and participation of those who are furthest behind,

Underlining the priority and urgency given by Heads of State and Government to the eradication of poverty in all its forms and dimensions, including extreme poverty, as expressed in the outcomes of the major United Nations conferences and summits in the economic, social and related fields,

1. *Takes note* of the report of the Secretary-General;[13]

2. *Recognizes* that the Third United Nations Decade for the Eradication of Poverty (2018–2027) will complement the ongoing efforts of the international community to implement, as applicable, inter alia, the 2030 Agenda for Sustainable Development, [14] the Addis Ababa Action Agenda of the Third International Conference on Financing for Development,[15] the Paris Agreement adopted under the United Nations Framework Convention on Climate Change,[1] the Sendai Framework for Disaster Risk Reduction 2015–2030,[10] the New Urban Agenda,[3] the outcome document of the United Nations Conference on Sustainable Development entitled "The future we want",[5] the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020,[16] as well as the Political Declaration of the Comprehensive High-level Midterm Review of the Implementation of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020,[17] the SIDS Accelerated Modalities of Action (SAMOA) Pathway, [18] the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024,[19] the declaration entitled "Our ocean, our future: call for action" adopted at the United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development,[20] the United Nations strategic plan for forests 2017–2030[21] and Agenda 2063 of the African Union, as well as its first 10-year implementation plan and its continental programme embedded in the resolutions of the General Assembly on the New Partnership for Africa's Development and regional initiatives, such as the Comprehensive Africa Agriculture Development Programme;

3. *Also recognizes* the contribution that the Second Decade has made to poverty eradication, and underlines the importance of drawing lessons from the

[13] A/73/298.
[14] Resolution 70/1.
[15] Resolution 69/313, annex.

[17] Resolution 70/296, annex.
[18] Resolution 69/15, annex.
[19] Resolution 69/137, annex II.
[20] Resolution 71/312, annex.
[21] See resolution 71/285.

implementation of the Second Decade and the Millennium Development Goals, in particular with respect to strengthening national statistical capacity and monitoring systems to ensure access to data which are of high quality, accessible, timely, reliable and disaggregated by income, sex, age, race, ethnicity, migration status, disability and geographic location and other characteristics relevant in national contexts, harnessing partnerships, fostering the global exchange of ideas and experiences and showcasing innovative and efficient initiatives and strategies to eradicate poverty, reduce inequalities within and among countries and promote decent work for all;

4. *Reaffirms* that the objective of the Third United Nations Decade for the Eradication of Poverty (2018–2027) is to maintain the momentum generated by the implementation of the Second Decade and to support, in an efficient and coordinated manner, the internationally agreed development goals related to poverty eradication, including the Sustainable Development Goals and their objective of leaving no one behind and reaching the furthest behind first;

5. *Also reaffirms* that eradicating poverty in all its forms and dimensions, including extreme poverty, for all people everywhere, is the greatest global challenge and an indispensable requirement for sustainable development, as well as an overarching objective of the 2030 Agenda for Sustainable Development, of which the Addis Ababa Action Agenda is an integral part;

6. *Further reaffirms* that each country must take primary responsibility for its own economic and social development and that the role of national policies and development strategies for the achievement of sustainable development and poverty eradication cannot be overemphasized, and recognizes that increased effective national efforts should be complemented by concrete, effective and supportive international programmes, measures and policies aimed at expanding the development opportunities of developing countries, while taking into account national conditions and ensuring respect for national ownership strategies and sovereignty;

7. *Welcomes* the remarkable progress made since 1990, which has lifted over 1.1 billion people out of extreme poverty, and the unprecedented decrease in the percentage of people living on less than 1.90 United States dollars a day[22] since the beginning of the Second Decade;

8. *Expresses its deep concern* that, while there has been progress in reducing poverty, such progress remains uneven, with 1.3 billion people still living in multidimensional poverty, this number continues to be significant and unacceptably high, the levels of inequality in income, wealth and opportunities remain high or are increasing in a number of countries, and the non-income dimensions of poverty and deprivation, such as access to quality education or basic health services, and relative poverty remain major concerns;

9. *Calls upon* the international community, including Member States and the organizations of the United Nations development system, including the funds and programmes and the specialized agencies, in accordance with their mandates to continue to accord the highest priority to poverty eradication within the United Nations development agenda and to urgently take measures to address the root causes and challenges of poverty in all its forms and dimensions, including extreme poverty, hunger and all forms of malnutrition, in the light of their negative impacts on sustainable development, through integrated, coordinated and coherent strategies at

[22] From 2008 to mid-2015, United Nations reports on the Millennium Development Goals used a poverty line of 1.25 United States dollars a day, converted to national currencies at 2005 purchasing power parity exchange rates. Since mid-2015, the poverty line has been updated to 1.90 dollars a day, converted at 2011 purchasing power parity exchange rates.

all levels, in accordance with the outcomes of the major United Nations conferences and summits in the economic, social and related fields, and calls upon donor countries in a position to do so to support the effective national efforts of developing countries in this regard through predictable financial resources and technical assistance on bilateral and multilateral bases;

10. *Also calls upon* the international community, including Member States, to continue their ambitious efforts to strive for more inclusive, equitable, balanced, stable and development-oriented sustainable socioeconomic approaches to overcoming poverty, and, in view of the negative impact of all forms of inequality, including gender inequality, on poverty, emphasizes the importance of structural transformation that leads to inclusive and sustainable industrialization for employment creation and poverty reduction, investing in sustainable agriculture and quality, reliable, sustainable and resilient infrastructure to support economic development and human well-being, with a focus on affordable and equitable access for all, enhancing interconnectivity and achieving access to energy, and improving access to financial services, as well as promoting decent rural employment, improving access to quality education, promoting quality health-care services, including through the acceleration of the transition towards equitable access to universal health coverage, advancing gender equality and the empowerment of all women and girls, expanding social protection coverage, climate change mitigation and adaptation and combating inequality and social exclusion;

11. *Recognizes* the urgent need to address poverty in all its forms and dimensions, including extreme poverty, hunger, malnutrition and food insecurity, which will lead to rich payoffs across the Sustainable Development Goals, and encourages the international community to enhance international cooperation and to devote resources to developing rural and urban areas and sustainable agriculture and fisheries and to supporting smallholder farmers, especially women farmers, herders and fishers in developing countries, particularly in the least developed countries;

12. *Stresses* the resolve to eradicate extreme poverty for all people everywhere, measured since mid-2015 as living on less than 1.90 dollars a day, and the efforts to reduce at least by half the proportion of men, women and children of all ages living in poverty in all its forms and dimensions, according to national definitions;

13. *Invites* all relevant stakeholders, including organizations of the United Nations system and civil society organizations, to share good practices relating to programmes and policies that address inequalities for the benefit of those living in extreme poverty and promote the active participation of those living in extreme poverty in the design and implementation of such programmes and policies, with the aim of achieving the 2030 Agenda for Sustainable Development;

14. *Welcomes* the contributions of South-South cooperation to poverty eradication and sustainable development and reaffirms that South-South cooperation is an important element of international cooperation for development as a complement to, not a substitute for, North-South cooperation, and commits to strengthening South-South and triangular cooperation as a means of bringing relevant experience and expertise to bear in development cooperation;

15. *Emphasizes* the importance of the outcome of the Second United Nations Decade for Poverty Eradication of promoting and supporting the integration of decent work and poverty eradication into national and international policies, strategies and programmes, with a particular focus on those who risk being left behind, by, inter alia, implementing measures to formalize employment, consider introducing or strengthening minimum wages, guarantee respect for freedom of association and

collective bargaining rights, combat all forms of discrimination in employment and end child and forced labour, including in agriculture and rural areas;

16. *Notes with concern* the continuing high levels of unemployment and underemployment, inter alia, among young people, including young women in particular, recognizes that decent work for all remains one of the best routes out of poverty, and in this regard invites donor countries, multilateral organizations and other development partners to continue to assist Member States, in particular developing countries, in adopting policies consistent with the Global Jobs Pact adopted by the International Labour Conference at its ninety-eighth session as a general framework within which each country can formulate policy packages specific to its situation and national priorities in order to promote a job-intensive recovery and sustainable development;

17. *Recognizes* that substantial and efficiently spent investments are needed to improve the quality of and access to education and in order to enable millions of people to acquire skills for decent work, and takes note with appreciation of the report of the International Commission on Financing Global Education Opportunity and the recommendations contained therein, as appropriate;

18. *Encourages* the international community to support developing countries in their efforts to eradicate poverty in all its forms and dimensions, including extreme poverty, and achieve gender equality and the empowerment of all women and girls, the poor and people in vulnerable situations, with a view to achieving the internationally agreed development goals, including the Sustainable Development Goals, as established by the 2030 Agenda for Sustainable Development, which builds upon the achievement of the Millennium Development Goals and addresses their unfinished business, improving tax systems and access to financial services, including affordable microfinance and credit, removing barriers to opportunity, enhancing productive capacity, entrepreneurship, creativity and innovation, encouraging the formalization and growth of micro-, small and medium-sized enterprises, developing sustainable agriculture and promoting full and productive employment and decent work for all, emphasizing the important role of national efforts aimed at bringing workers from the informal to the formal economy, guided, as appropriate, by the Transition from the Informal to the Formal Economy Recommendation, 2015 (No. 204), of the International Labour Organization, complemented by national efforts on effective social policies, including social protection floors, and in this regard takes note of the Social Protection Floors Recommendation, 2012 (No. 202), of the International Labour Organization;

19. *Reaffirms its commitment* to embracing diversity in cities and human settlements, to strengthening social cohesion, intercultural dialogue and understanding, tolerance, mutual respect, gender equality, innovation, entrepreneurship, inclusion, identity and safety, and the dignity of all people, as well as to fostering liveability and a vibrant urban economy and to taking steps to ensure that local institutions promote pluralism and peaceful coexistence within increasingly heterogeneous and multicultural societies;

20. *Acknowledges* that good governance at the national and international levels and sustainable, inclusive, sustained and equitable economic growth, supported by full employment and decent work for all, and social integration, rising productivity and a favourable environment, including public and private investment, inter alia public-private partnership in a wide range of areas, and entrepreneurship, are necessary to eradicate poverty, to achieve the internationally agreed development goals, including the Sustainable Development Goals, which builds upon the achievement of the Millennium Development Goals and addresses their unfinished business, and to realize a rise in living standards, and that corporate social

responsibility initiatives play an important role in maximizing the impact of public and private investment;

21. *Stresses* the importance of using multidimensional indicators and developing transparent measurements of progress on sustainable development that complement gross domestic product in order to effectively reflect the reality of the populations of all developing countries, eradicate poverty in all its forms and dimensions, including extreme poverty, and reduce inequality everywhere, in accordance with the 2030 Agenda for Sustainable Development;

22. *Recognizes* that social and economic development depends on the sustainable management of the natural resources of the planet, and stresses the importance of conserving and sustainably using oceans and seas, freshwater resources, forests, mountains and drylands and protecting biodiversity, ecosystems and wildlife, as well as promoting sustainable tourism, tackling water scarcity and water pollution, strengthening cooperation on desertification, dust storms, degraded land and soil and drought, promoting resilience and disaster risk reduction, addressing decisively the threat posed by climate change and environmental degradation and implementing the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns;[23]

23. *Also recognizes* that sustainable, inclusive, sustained and equitable economic growth is essential for eradicating poverty and hunger, in particular in developing countries, and stresses that national efforts in this regard should be complemented by an enabling international environment and by ensuring greater coherence among macroeconomic and social policies at all levels;

24. *Stresses* the importance of taking targeted measures to eradicate poverty in all its forms and dimensions, including extreme poverty, of implementing nationally appropriate social protection systems and measures for all, including social protection floors, and of achieving substantial coverage of the poor and the vulnerable, and encourages Member States to continue to develop and implement social protection floors based on national priorities, paying particular attention to women, children, older persons, indigenous peoples and persons with disabilities;

25. *Also stresses* the importance of policies and actions that are not just gender-responsive but that actively seek to advance the goal of gender equality and women's and girls' empowerment as well as to address longer-term structural issues, including structural constraints faced by women as economic agents, and to remove any barriers that prevent women from being full participants in the economy, by, inter alia, undertaking legislation and administrative reforms, as appropriate, to give women equal rights with men in political and economic decision-making and access to economic resources and to promote the reconciliation of work and family responsibilities, including through paid maternity and parental leave and the redistribution of the disproportionate work burden of women engaged in unpaid work, including domestic and care work, encourages the private sector, in accordance with national legislation, to contribute to advancing gender equality by striving to ensure women's full and productive employment and decent work, equal pay for equal work or work of equal value and equal opportunities, as well as by protecting them against discrimination and abuse in the workplace, and underlines that globally, gross domestic product could increase significantly if every country achieved gender equality and increased participation of women in the formal labour force;

26. *Emphasizes* the reference in the 2030 Agenda for Sustainable Development to the need to ensure the significant mobilization of financial and non-financial resources from a variety of sources, including through enhanced

[23] A/CONF.216/5, annex.

development cooperation, as well as regional, subregional and interregional cooperation, in order to provide predictable means for all developing countries, in particular the least developed countries, to implement programmes and policies to end poverty in all its forms and dimensions;

27. *Stresses* that the achievement of sustainable development and the eradication of poverty also hinge on the ability and readiness of countries to effectively mobilize domestic resources, attract foreign direct investment, fulfil official development assistance (ODA) commitments and use ODA effectively, and facilitate the transfer of technology, on mutually agreed terms, to developing countries, and also stresses that the resolution of unsustainable debt situations is critical for heavily indebted poor countries, while remittances, the transaction costs for which should be reduced, have become a significant source of income and finance for receiving economies and their contribution to the achievement of sustainable development;

28. *Recognizes* that the Addis Ababa Action Agenda provides a global framework for financing sustainable development and is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it and helps to contextualize its means of implementation targets with concrete policies and actions, which relate to domestic public resources, domestic and international private business and finance, international development cooperation, international trade as an engine for development, debt and debt sustainability, addressing systemic issues and science, technology, innovation and capacity-building, and data, monitoring and follow-up, and its full implementation will be critical to effectively implement the Third Decade;

29. *Also recognizes* that domestic resources mobilization, underscored by the principle of national ownership and supplemented by international assistance, as appropriate, will be critical to realizing sustainable development and achieving the Sustainable Development Goals;

30. *Further recognizes* that private business activity, entrepreneurship, investment and innovation are major drivers of productivity, inclusive economic growth and job creation and that private international capital flows, particularly foreign direct investment, along with a stable international financial system, are vital complements to national development efforts;

31. *Recognizes* that more can be done to create competitive business and investment climates in support of sustainable development that are well placed to attract private sector investment and participation, and encourages an increase in the volume, quality, in particular its alignment with the Sustainable Development Goals, diversification and long-term nature of foreign direct investment to all developing countries;

32. *Welcomes* the progress on financial inclusion across all income groups and all regions in recent years, while being concerned that 2 billion people, primarily in rural areas in developing countries, still do not have access to formal financial services and remaining concerned about the gender gap in financial inclusion;

33. *Notes* that an important use of international public finance, including ODA, is to catalyse additional resource mobilization from other sources, public and private, and through appropriately designed risk-sharing instruments, including co-investments, public-private partnerships and guarantees, and also notes that it can support improved tax collection, help to strengthen domestic enabling environments and build essential public services and can also be used to unlock additional finance through blended or pooled financing and risk mitigation, notably for infrastructure and other investments that support private sector development;

34. *Emphasizes* that international public finance plays an important role in complementing the efforts of countries to mobilize public resources domestically, especially in the poorest and most vulnerable countries with limited domestic resources;

35. *Stresses* the importance of mobilizing greater domestic support towards the fulfilment of ODA commitments, including by raising public awareness, providing data on aid effectiveness and demonstrating tangible results, encourages partner countries to build on progress achieved in ensuring that ODA is used effectively to help to achieve development goals and targets, encourages the publication of forward-looking plans which increase the clarity, predictability and transparency of future development cooperation, in accordance with national budget allocation processes, and urges countries to track and report resource allocations for advancing gender equality and the empowerment of all women and girls;

36. *Expresses concern* that in 2017 ODA fell by 0.6 per cent compared with 2016, while bilateral (country-to-country) aid to least developed countries rose by 4 per cent, after remaining flat for the previous six years, and that ODA was, on average, 0.31 per cent of the aggregate donor gross national income in 2014, below the commitment of 0.7 per cent, reiterates that the fulfilment of all ODA commitments remains crucial and that, for many least developed countries and landlocked developing countries, ODA remains the largest source of external financing, and therefore emphasizes the importance of the commitments made by many countries to achieve the national target of 0.7 per cent of gross national income and 0.15 to 0.20 per cent of gross national income for official development assistance to the least developed countries, and calls upon developed countries to deliver on their commitments in relation to ODA;

37. *Welcomes* the increasing efforts to improve the quality of ODA and to increase its development impact, recognizes the Development Cooperation Forum of the Economic and Social Council, notes other initiatives, such as the high-level forums on aid effectiveness, which produced, inter alia, the Paris Declaration on Aid Effectiveness, the Accra Agenda for Action,[24] and the Busan Partnership for Effective Development Cooperation, which make important contributions to the efforts of the countries that have made commitments to them, including through the adoption of their fundamental principles, and bears in mind that there is no one-size-fits-all formula that will guarantee effective assistance and that the specific situation of each country needs to be fully considered;

38. *Encourages* all relevant stakeholders, as appropriate, to strengthen United Nations funding for the eradication of poverty in all its forms and dimensions, including extreme poverty, through voluntary contributions to existing poverty-related system-wide funds;

39. *Acknowledges* the complexity of the challenge of poverty eradication, and in this regard emphasizes that, in accelerating poverty eradication and effectively implementing the Third Decade, the organizations of the United Nations development system must be driven by national priorities, including through the United Nations Development Assistance Framework, with the development of national capacities and development strategies in developing countries continuing to be a core area of focus, and operate in an integrated, coordinated and coherent manner, through development programmes and projects that address poverty eradication as their underlying objective, within their respective mandates, in order to ensure that gains are irreversible, making full use of the interlinked and mutually reinforcing pillars of the United Nations development system, and encourages the use of diverse strategies;

[24] A/63/539, annex.

40. *Reiterates* the need to strengthen the leadership role of the United Nations in promoting international cooperation for development, and recognizes the role of the specialized agencies and United Nations funds and programmes and regional commissions, including the International Labour Organization, the Food and Agriculture Organization of the United Nations, the United Nations Development Programme, the United Nations Industrial Development Organization, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the United Nations Population Fund, the United Nations Children's Fund, the Economic and Social Commission for Asia and the Pacific, the Economic and Social Commission for Western Asia, the Economic Commission for Africa, the Economic Commission for Latin America and the Caribbean and the Economic Commission for Europe, in contributing to international advocacy for eradicating poverty in all its forms and dimensions, including through education and training;

41. *Welcomes* the ongoing work by the relevant organizations of the United Nations system to support the implementation of the Third Decade, including the system-wide plan of action to coordinate the efforts of the United Nations system that can accelerate progress towards poverty eradication in all countries, and further encourages greater inter-agency convergence and collaboration within the United Nations system in sharing knowledge, promoting policy dialogue, facilitating synergies, mobilizing funds, providing technical assistance in the key policy areas underlying the decent work agenda and strengthening system-wide policy coherence on employment issues, including by avoiding the duplication of efforts;

42. *Calls upon* the relevant organizations of the United Nations system, within their respective mandates and resources, to ensure that no one is left behind and no country is left behind in the implementation of the present resolution;

43. *Calls upon* the international community to give priority to addressing the impacts of natural disasters, climate change, conflicts and major outbreaks of disease which are severely hampering efforts to achieve poverty eradication, in particular in developing countries;

44. *Recognizes* the importance of addressing the diverse needs of and challenges faced by countries in special situations, in particular African countries, the least developed countries, landlocked developing countries and small island developing States, as well as the specific challenges facing many middle-income countries, and therefore requests the United Nations development system, the international financial institutions, regional organizations and other stakeholders to ensure that these diverse and specific development needs are appropriately considered and addressed, in a tailored fashion, in their relevant strategies and policies, with a view to promoting a coherent and comprehensive approach towards individual countries;

45. *Invites* all States, organizations of the United Nations system, intergovernmental organizations concerned and interested national organizations, including non-governmental organizations, to consider organizing activities for the celebration in 2019 of the twenty-seventh anniversary of the declaration by the General Assembly, in its resolution 47/196 of 22 December 1992, of 17 October as the International Day for the Eradication of Poverty, in order to raise public awareness to promote the eradication of poverty and extreme poverty in all countries, and in this regard recognizes the useful role that the observance of the International Day continues to play in raising public awareness and mobilizing all stakeholders in the fight against poverty and promoting the active participation of those living in extreme poverty in the design and implementation of programmes and policies which affect them, with the aim of achieving the 2030 Agenda for Sustainable Development;

46. *Requests* the Secretary-General to submit to the General Assembly at its seventy-fourth session a report that details the response of the United Nations system on the implementation of the Third Decade, includes an inter-agency, system-wide plan of action for poverty eradication to coordinate the efforts of the United Nations system, and contains recommendations concerning how to make the Third United Nations Decade for the Eradication of Poverty (2018–2027) effective, in support of the poverty eradication-related internationally agreed development goals, including the Sustainable Development Goals, utilizing, as appropriate, existing expertise and poverty-related follow-up mechanisms and processes;

47. *Decides* that the theme of the Third Decade shall be "Accelerating global actions for a world without poverty" in line with the 2030 Agenda for Sustainable Development;

48. *Also decides* to include in the provisional agenda of its seventy-fourth session, under the item entitled "Eradication of poverty and other development issues", the sub-item entitled "Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)", unless otherwise agreed.

United Nations A/C.2/73/L.10/Rev.1

General Assembly

Seventy-third session
Second Committee
Agenda item 24 (b)
Eradication of poverty and other development issues: industrial development cooperation

Egypt:* revised draft resolution

Industrial development cooperation

The General Assembly,

Recalling its resolutions 49/108 of 19 December 1994, 51/170 of 16 December 1996, 53/177 of 15 December 1998, 55/187 of 20 December 2000, 57/243 of 20 December 2002, 59/249 of 22 December 2004, 61/215 of 20 December 2006, 63/231 of 19 December 2008, 65/175 of 20 December 2010, 67/225 of 21 December 2012, 69/235 of 19 December 2014 and 71/242 of 21 December 2016,

Recalling also the outcomes of all major United Nations conferences and summits in the economic, social, environmental and related fields,

Reaffirming its resolution 70/1 of 25 September 2015, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming also its resolution 71/243 of 21 December 2016 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system and its general guidelines and principles, as well as resolution 72/279 of 31 May 2018, and welcoming the ongoing efforts of the Secretary-General to better position the United Nations operational activities for development to support countries in their efforts to implement the 2030 Agenda for Sustainable Development,

Reaffirming further its resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development,

* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

Please recycle

which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

Recognizing that multi-stakeholder partnerships and the resources, knowledge and ingenuity of the private sector, civil society, the scientific community, academia, philanthropy and foundations, parliaments, local authorities, volunteers and other stakeholders will be important to mobilize and share knowledge, expertise, technology and financial resources and complement the efforts of Governments,

Reaffirming the Paris Agreement,[1] and encouraging all its parties to fully implement the Agreement, and parties to the United Nations Framework Convention on Climate Change[2] that have not yet done so to deposit their instruments of ratification, acceptance, approval or accession, where appropriate, as soon as possible,

Reaffirming also the New Urban Agenda, adopted at the United Nations Conference on Housing and Sustainable Urban Development (Habitat III), held in Quito in October 2016,

Taking note of the outcome documents of the fourteenth session of the United Nations Conference on Trade and Development, held in Nairobi in 2016,

Recalling its resolution 70/293 of 25 July 2016 on the Third Industrial Development Decade for Africa (2016–2025), in which it underlined the need for the African continent to take urgent action to support the inclusive and sustainable industrialization of Africa in order to build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation, as well as to achieve other relevant Sustainable Development Goals of the 2030 Agenda for Sustainable Development,

Recalling also its resolution 72/233 of 20 December 2017 on the implementation of the Second United Nations Decade for the Eradication of Poverty (2008–2017), in which it emphasized the essential role of inclusive and sustainable industrial development as part of a comprehensive strategy of structural economic transformation in eradicating poverty,

Recalling further the fifteenth session of the General Conference of the United Nations Industrial Development Organization, held in Lima in December 2013, and the Lima Declaration: towards inclusive and sustainable industrial development,[3] in which the General Conference notably reaffirmed the unique mandate of the Organization and laid the foundation for its upcoming work to support member States in achieving inclusive and sustainable industrial development,

Recalling that the Addis Ababa Action Agenda, recognized, inter alia, the critical importance of industrial development for developing countries as a critical source of economic growth, economic diversification and value addition,

Noting the ongoing efforts to implement the Programme of Action for the Least Developed Countries for the Decade 2011–2020, adopted in May 2011 at the Fourth United Nations Conference on the Least Developed Countries,[4] the SIDS Accelerated Modalities of Action (SAMOA) Pathway, adopted in September 2014 at the third

[1] Adopted under the UNFCCC in FCCC/CP/2015/10/Add.1, decision 1/CP.21.

[4] *Report of the Fourth United Nations Conference on the Least Developed Countries, Istanbul, Turkey, 9–13 May 2011* (A/CONF.219/7), chap. II.

International Conference on Small Island Developing States,[5] and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, adopted in November 2014 at the second United Nations Conference on Landlocked Developing Countries,[6] and recognizing that middle-income countries still face significant challenges in achieving sustainable development and the need, among other things, for improved coordination and better and focused support by the United Nations development system,

Taking note of the report of the Director General of the United Nations Industrial Development Organization on the Strategic Framework for Partnering with Middle-Income Countries[7] developed in accordance with resolution GC.17/Res.6 of 1 December 2017 of the General Conference of the United Nations Industrial Development Organization, entitled "Sustainable industrial development in middle-income countries",[8]

Noting that inclusive and sustainable industrial development can effectively contribute to the achievement of the 2030 Agenda for Sustainable Development, integrating, in a balanced manner, the three dimensions of sustainable development,

Acknowledging the industrial development reports prepared by the United Nations Industrial Development Organization, which examine structural change and inclusive and sustainable industrial development policies to improve the contribution of industry to sustainable production and consumption, social inclusion, gender equality, decent work, productivity growth, technology and innovation, and resource efficiency, including but not limited to energy efficiency,

Reiterating that each country has the right and the primary responsibility to define its development strategies in accordance with its national priorities and in line with the internationally agreed development goals, including the Sustainable Development Goals, noting the past withdrawals from the membership of the United Nations Industrial Development Organization, as well as the importance of member States in arrears fulfilling their obligations, and the potential impact on the Organization's capacity to deliver, and in this regard inviting all countries to align their support and development efforts towards the full implementation of the 2030 Agenda for Sustainable Development,

Recognizing the importance for the United Nations Industrial Development Organization of continuing to reach out to all States Members of the United Nations and of encouraging them to join the Organization, in the spirit of a revitalized global partnership for sustainable development and with a view to strengthening the means of implementation of Sustainable Development Goal 9 and other relevant and interlinked goals and targets of the 2030 Agenda for Sustainable Development,

Recognizing also the importance of the United Nations Industrial Development Organization in addressing the root causes of poverty by providing solutions, inter alia, for job creation, economic competitiveness and productive capability, through strengthening its efforts in promoting inclusive and sustainable development,

Emphasizing the essential role of inclusive and sustainable industrial development as part of a comprehensive strategy of structural economic transformation in eradicating poverty in all its forms and dimensions, including extreme poverty, and supporting sustained economic growth, and thus in contributing to achieving sustainable development in developing countries, including the most vulnerable countries, and in particular African countries, least developed countries,

[5] Resolution 69/15, annex.
[6] Resolution 69/137, annex II.
[7] See IDB.46/13.
[8] See GC.17/INF/4.

landlocked developing countries and small island developing States, while recognizing the significant challenges facing middle-income countries, and emphasizing further that countries in situations of conflict also need special attention,

Recognizing the diversity of ways to achieve inclusive and sustainable industrial development and, in this connection, that each country has the primary responsibility for its own development and the right to determine its own development paths and appropriate strategies, in line with relevant international rules and commitments, taking into account different national capacities, needs and levels of development and respecting national policies and priorities,

Recalling that the Sustainable Development Goals and targets are integrated and indivisible and balance the three dimensions of sustainable development, and acknowledging that building resilient and quality infrastructure, promoting inclusive and sustainable industrialization, fostering innovation and achieving the interlinked targets of the other Sustainable Development Goals will be critical,

Stressing the importance of international industrial cooperation in promoting inclusive and sustainable industrialization, the creation of decent jobs, including for young people, inclusive economic growth, pollution control, knowledge networking, resource efficiency, access to clean, safe and sustainable energy, gender equality and women's empowerment, and opportunities for all members of society to participate in economic activities and to address major challenges and issues such as poverty, climate change, shifting demographics and growing inequalities,

Stressing also that the creation, development and diffusion of new innovations and technologies and associated know-how, including the transfer of technology on mutually agreed terms, are powerful drivers of economic growth and sustainable development,

Underscoring the importance of using science, technology and innovation, and entrepreneurship to build and maintain resilient industrial infrastructure and achieve inclusive and sustainable industrial development,

Recognizing the potential benefits for countries to transform their economies to promote sustainable consumption and production patterns, by engaging with partners to integrate or implement concepts such as circular economy and Industry 4.0 for more sustainable industrial activity and manufacturing systems, according to national plans and priorities,

Recognizing also the role of the business community, including the private sector, in enhancing the dynamic process of the development of the industrial sector, underlining the importance of the benefits of foreign direct investment in that process, and recognizing also in this regard that an enabling national environment is vital for mobilizing national resources, increasing productivity, fostering long-term and quality investment, encouraging the private sector and making effective use of international investment and assistance, and that efforts to create such an environment should be supported by the international community,

Emphasizing the important role of micro-, small and medium-sized enterprises in industrial development, as well as public-private partnerships and entrepreneurship, in meeting the challenges of sustainable development, and in this regard underlining the responsibility of private actors to create new business practices and models by applying innovative market-based solutions to social and environmental problems that are inclusive, environmentally friendly, respect human rights, provide equal opportunities for women and youth and integrate frontier technologies that characterize the new industrial revolution and offer opportunities for society, but also raise concerns, such as, the future of work and widening

inequalities within and between nations, and therefore the need for international coordination, knowledge-sharing and targeted support,

Highlighting the fact that ensuring inclusive and sustainable industrial development requires consistent industrial policies and institutional frameworks that are duly supported by the necessary investment in industrial infrastructure, clean technology, climate change action, innovation, environmental technologies and skills development,

Recalling the establishment, by its resolution 69/313, of the Technology Facilitation Mechanism, and the launch, by its resolution 70/1, of the Mechanism, and looking forward to further collaboration between Member States, civil society, the private sector, the scientific community, United Nations entities and other stakeholders to promote inclusive and sustainable industrial development,

Reiterating the pledge that no one will be left behind, reaffirming the recognition that the dignity of the human person is fundamental, and the wish to see the Goals and targets met for all nations and peoples and for all segments of society, and recommitting to endeavour to reach the furthest behind first,

Recommitting to ensuring that no country or person is left behind and to focusing our effort where the challenges are greatest, including by ensuring the inclusion and participation of those who are furthest behind,

1. *Takes note with appreciation* of the report of the Director General of the United Nations Industrial Development Organization;[9]

2. *Notes with appreciation* the adoption, on 2 December 2013, of the Lima Declaration: towards inclusive and sustainable industrial development,[5]

3. *Reaffirms* the indivisible and inclusive nature of the Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development,[10] while acknowledging that achieving inclusive and sustainable industrialization is integral to the efforts to achieve the Sustainable Development Goals;

4. *Recognizes* the unique mandate of the United Nations Industrial Development Organization, within the United Nations system, to promote inclusive and sustainable industrial development and the important contribution to be made by that Organization, in partnership with other relevant private and public entities and stakeholders, including new multilateral development finance institutions and funds, to strengthening existing partnerships and networks at the global, regional and subregional levels, including South-South and triangular cooperation, as appropriate and in accordance with their respective mandates, in supporting the achievement of the 2030 Agenda for Sustainable Development, including all relevant Sustainable Development Goals and targets;

5. *Also recognizes* the contribution of the United Nations system, international financial institutions, international trade and economic institutions and all other relevant entities in supporting the promotion of inclusive and sustainable industrial development, in accordance with their respective mandates, in order to increase their effectiveness and to strengthen cooperation with non-governmental organizations and the public and private sectors in promoting and strengthening efforts towards inclusive and sustainable industrial development;

6. *Further recognizes* that inclusive and sustainable industrial development can play a crucial role in the realization of other major development objectives, including the Sustainable Development Goals and targets, since through inclusive and

[9] See A/73/121.

[10] Resolution 70/1.

sustainable industrial development policies and practices, countries can achieve self-sustaining economic and social development in an environmentally sustainable framework;

7. *Reiterates* the policies, actions and objectives outlined in the Addis Ababa Action Agenda [11] to invest in promoting inclusive and sustainable industrial development to effectively address major challenges such as growth and jobs, resources and energy efficiency, pollution and climate change, knowledge-sharing, innovation and social inclusion;

8. *Recognizes* that the mobilization of national and international resources and an enabling national and international environment are key drivers for sustainable development;

9. *Underlines* the potential benefits, for developing countries, of stepping up their efforts to finance their own development by improving domestic resource mobilization and promoting financing, spurred by a robust and vibrant industrial sector, in order to achieve a long-term impact through local, national and regional ownership;

10. *Emphasizes* that each country must take the primary responsibility for its own industrial development, that national ownership and leadership are indispensable in the development process and that the role of national policies, resources and development strategies cannot be overemphasized, and also emphasizes that it is crucial to maintain capacity for effective industrial policy design and implementation, consistent with international obligations, and thereby take into account the regional strategies and policies agreed upon, as appropriate;

11. *Recalls* the launch in 2016 of the Global Infrastructure Forum, led by the multilateral development banks, welcomes the holding of the forum in Bali in October 2018, and looks forward to relevant cooperation to advance the linkages among infrastructure development, inclusive and sustainable industrialization and innovation;

12. *Encourages* the United Nations Industrial Development Organization to continue to promote, within its mandate, its strategic priorities of creating shared prosperity, advancing economic competitiveness, safeguarding the environment and strengthening knowledge and institutions, through its four core functions, which include technical cooperation; policy advice, research and statistics; normative functions and standards and quality-related activities; and partnership-building for knowledge transfer, networking and industrial cooperation;

13. *Recalls with appreciation* the Group of 20 Initiative on Supporting Industrialization in Africa and Least Developed Countries, launched by the leaders of the Group of 20 at its Summit held in Hangzhou, China in September 2016, [12] which aims at strengthening the inclusive growth and development potential of Africa and the least developed countries through voluntary policy options, and looks forward to its implementation while urging the Group of 20 to continue to engage with other States Members of the United Nations in its work and to ensure that any Group of 20 initiatives complement and strengthen the United Nations system;

14. *Reaffirms* that women play a critical role in development, contribute to structural transformation and are key contributors to the economy and to combating poverty and inequalities, that women's full, effective and equal participation in decision-making and the economy is vital in order to achieve sustainable development and significantly enhance economic growth and productivity and that realizing gender

[11] Resolution 69/313, annex.

[12] See A/71/380, annex.

equality and the empowerment of women and girls at all levels, including in decision-making processes, will make a crucial contribution to progress across all the Sustainable Development Goals, including in achieving inclusive and sustainable industrial development,

15. *Emphasizes* that national efforts should be supported by development partners, as appropriate, and need to be complemented by a rules-based multilateral trading system that facilitates trade and provides opportunities for developing countries that aim to broaden their competitive export base by strengthening their capacities, facilitating the structural transformation and diversification of their economies and enhancing the participation and integration of enterprises from developing countries, including micro and small-scale industrial enterprises, into global value chains and markets, which can help to promote economic growth and development, while taking into account support for local and regional industrial development and value chains, as appropriate;

16. *Also emphasizes* the need for the international community and the private sector, as appropriate, to contribute to creating an enabling environment for sustainable industrial development;

17. *Stresses* that national development efforts need to be supported by an enabling international economic environment, including coherent and mutually supporting world trade, monetary and financial systems, and strengthened and enhanced global economic governance, and that processes to develop and facilitate the availability of appropriate knowledge and technologies globally, as well as capacity-building, are also critical;

18. *Recognizes* the importance of the role of the private sector, as well as the role of public-private partnerships, in meeting the challenges of sustainable development, and in this regard underlines the importance of strengthening existing and forging new partnerships and networks at the global, regional and subregional levels, including through South-South and triangular cooperation, and the full involvement of all relevant stakeholders towards achieving inclusive and sustainable industrial development;

19. *Stresses* that a dynamic industrial and manufacturing sector is one of the many factors that can lead to narrowing income inequalities and to the development of social protection systems, as well as to reducing inequality within and among countries;

20. *Encourages* the United Nations Industrial Development Organization to continue to organize global dialogues and promote multi-stakeholder partnerships in order to actively pursue its important role in the achievement of inclusive and sustainable industrial development and to advance the linkages with infrastructure development and innovation for the achievement of the 2030 Agenda for Sustainable Development;

21. *Notes* the continuing cooperation of the United Nations Industrial Development Organization with the entities of the United Nations system, including the specialized agencies, funds and programmes;

22. *Underscores* the continuing work of the United Nations Industrial Development Organization as a global forum to disseminate knowledge and provide advice on industrial policies and strategies, successful industrialization experiences and best practices, as well as upcoming trends and challenges, as exemplified by the Global Manufacturing and Industrialization Summit held in Abu Dhabi from 27 to 30 March 2017, the Vienna Energy Forum and the Green Industry Conference;

23. *Notes* the initiative to host in Yekaterinburg in July 2019 the Global Manufacturing and Industrialization Summit with the aim to intensify the impact of innovation and new industrial revolution technologies on the global manufacturing sector through the worldwide dissemination of knowledge, best practices and standards,

24. *Recognizes* the key role of the United Nations Industrial Development Organization in promoting sustainable industrial development and industrial innovation and mainstreaming science and technology into national productive systems;

25. *Encourages* regional, subregional and interregional cooperation as a platform for international industrial cooperation aiming to promote investments and technology transfer on mutually agreed terms, to disseminate good policies and practices, as well as to foster decent work, including for youth and women;

26. *Welcomes* the alignment by the United Nations Industrial Development Organization of its medium-term policy framework with the new quadrennial comprehensive policy review cycle, especially as set out in resolution 72/279;

27. *Notes* the Programmes for Country Partnership of the United Nations Industrial Development Organization, already launched, as a promising model to foster inclusive and sustainable industrial development for its member States, and looks forward to its continued expansion to achieve greater geographic coverage with due consideration to the specific needs of different countries, as stipulated in the Lima Declaration;

28. *Encourages* the United Nations Industrial Development Organization to continue to assist developing countries, including African countries, the least developed countries, landlocked developing countries, small island developing States and countries in conflict and post-conflict situations, as well as middle-income countries facing specific challenges, in participating in productive activities through, inter alia, the development of sustainable agro-industry and agribusiness that improves food security, eradicates hunger, creates jobs and is economically viable, and in this regard, encourages new donors to support the unique work of the Organization in these regions;

29. *Encourages* the promotion of South-South cooperation, triangular cooperation and the transfer, diffusion and adoption of technology on mutually agreed terms in building their engagement in international trade through the development of micro, small and medium-sized enterprises;

30. *Encourages* supporting the meeting of international product and process standards and the integration of women and youth into the development process;

31. *Encourages* the United Nations Industrial Development Organization to support developing countries, upon request and in line with their development priorities, in achieving enhanced levels of inclusive and sustainable industrial development by assisting them in building sustainable productive and trade capacities, including through support for policies in the context of job creation and poverty eradication in all its forms and dimensions, including extreme poverty, and in building institutional capacities for promoting environmentally sound and sustainable production, including through programmes on cleaner production, industrial water management, industrial energy efficiency and the utilization of efficient, modern and affordable forms of energy for productive use, especially in rural areas, and through continued cooperation with United Nations organizations and other organizations in order to support the achievement of multilateral environmental agreements and promote global goals on access to clean, safe and sustainable energy, including on renewable energy and energy efficiency;

32. *Also encourages* the United Nations Industrial Development Organization to continue strengthening its role in assisting developing countries to create and disseminate knowledge by, inter alia, making use of its global network of investment and technology promotion offices, resource-efficient and cleaner production centres, centres for South-South industrial cooperation and international technology centres as well as through its Networks for Prosperity initiative;

33. *Reiterates* the importance of promoting the creation and development of micro, small and medium-sized enterprises as a strategy for achieving industrial development, economic dynamism, poverty and hunger eradication and job creation, including through the mobilization of resources and measures to foster sustainable and inclusive development, and in this regard recalls International Labour Organization recommendation No. 189 concerning job creation in small and medium-sized enterprises;

34. *Acknowledges* the importance of reporting on corporate sustainability, encourages companies, where appropriate, especially publicly listed and large companies, to consider integrating sustainability information into their reporting cycle, and encourages industry, interested Governments and relevant stakeholders, with the support of the United Nations system, as appropriate, to develop models for best practices and to facilitate action for the integration of sustainability reporting, taking into account experiences gained from already existing frameworks and paying particular attention to the needs of developing countries, including for capacity-building;

35. *Welcomes* the ongoing support of the United Nations Industrial Development Organization for the New Partnership for Africa's Development,[13] the African (Accelerated) Agribusiness and Agro-industries Development Initiative, the Pharmaceutical Manufacturing Plan for Africa and other programmes of the African Union aimed at further strengthening the industrialization process in Africa;

36. *Notes with appreciation* the efforts of the World Bank and the regional development banks to support industrial development through financial programmes, and encourages the United Nations Industrial Development Organization to work closely with regional development banks on the implementation of their regional strategies, including with the African Development Bank on the implementation of their industrialization strategy for Africa;

37. *Stresses* the importance of the activities of the United Nations Industrial Development Organization, within its mandate, to support the efforts of middle-income countries to eradicate poverty in all its forms and dimensions, including extreme poverty, reduce inequalities and achieve sustainable development using, inter alia, the United Nations Industrial Development Organization Strategic Framework for Partnering with Middle-Income Countries;

38. *Encourages* the United Nations Industrial Development Organization to continue to promote, within its mandate, its thematic priorities of creating shared prosperity, advancing economic competitiveness and safeguarding the environment, through its four enabling functions, which include technical cooperation; analytical and research and policy advisory services; normative functions and standards and quality-related activities; and partnership-building for knowledge transfer, networking and industrial cooperation, with the aim of enhancing the quality of the services it provides to developing countries and countries with economies in transition, in accordance with its medium-term programme framework 2018–2021

[13] A/57/304, annex.

and taking into account the 2030 Agenda for Sustainable Development and other relevant development-related outcomes;

39. *Calls upon* the relevant organizations of the United Nations system, within their respective mandates and resources, to ensure that no one is left behind and no country is left behind in the implementation of the present resolution;

40. *Requests* the Secretary-General to submit to the General Assembly at its seventy-fifth session a report on the implementation of the present resolution, and decides to include in the provisional agenda of the seventy-fifth session, under the item entitled "Eradication of poverty and other development issues", the sub-item entitled "Industrial development cooperation".
